Software Engineer

Driven Senior Software Engineer with 6 years of experience crafting scalable mobile apps for startups and large organizations using iOS, Swift, React Native, and TypeScript. I deliver user-centric solutions and I thrive in fast-paced environments, integrating cutting-edge technologies to drive performance and innovation

WORK EXPERIENCE

iClassPro Inc
Senior Software Engineer · Full-time   **Longview, TX · Mar 2023 - Mar 2025**

- Rearchitected scalable React Native codebase using Atomic Design, optimized CI/CD with GitHub Actions, and conducted code reviews, reducing crash rates and improving deployment efficiency
- Collaborated with designers via JIRA to code and implement 10+ new React Native screens, aligning with user needs and best practices to enhance app usability

Nutrien
Software Engineer · Full-time   **Loveland, CO · Feb 2022 - Feb 2023**

- Developed a greenfield React Native mobile application using TypeScript and GraphQL
- Enhanced team collaboration by conducting code reviews and integrating XState for state management, improving code quality

Chewzer
Software Engineer · Contractor   **San Francisco, CA · Sep 2021 - Feb 2022**

- Integrated advanced features through iterative code reviews, aligning with best practices to deliver scalable solutions in a fast-paced, innovative environment

Copia
Software Engineer · Full-time   **San Francisco, CA · May 2020 - Sep 2021**

- Developed a React Native app from the ground up, implementing features to track food donations, leveraging REST APIs and web services for scalable performance in a startup
- Contributed to ReactJS web development, conducting reviews and providing constructive feedback to align with user-focused designs, enhancing client experiences

White Cloud Apps
Software Engineer · Contractor   **Fremont, CA · May 2019 - May 2020**

- Aligned development with best practices, ensuring scalable and maintainable code for efficient project delivery
- Delivered the Quench iOS app using Swift, guiding interns with constructive feedback to implement a user-friendly experience in a fast-paced startup
